r25.2.1 Changelog

```
+--------------------------------+
|   r25.2.1 Release - 166280
+--------------------------------+
```

Release day August 16th 2023

Fixes

- DSOF-23505 - Fixed an Access Violation that occurred if the Capture Setup widget was open while a capture is in progress

- DSOF-24762 - Fixed an issue where the GUI framerate fraction caused some strange widget behaviours

- DSOF-24888 - Fixed an issue where the Focus distance and Aperture would stick to 0 after an MR set observation

- DSOF-24922 - Fixed an issue where the sensor width was erroneously overridden by spatial calibration

- DSOF-24950 - Fixed an Access Violation when importing objects

- DSOF-24965 - Fixed an issue where long entries in the debug window would cause a '<NULL>' notification to appear.
