r25.2.3 Changelog

+----------------------------------+
| r25.2.3 Release - 167492
+----------------------------------+

Release day August 30th 2023

Fixes

As part of r25.2.2

- DSOF-23391 - Fixed an Access Violation when opening 'Manage Old Media'
- DSOF-24694 - Fixed an issue where the frontplate was not aligned correctly when in minimal latency mode
- DSOF-24889 - Fixed an issue where OSC Expressions did not working properly after loading snapshot
- DSOF-24985 - Fixed an issue where use of Renderstream texture parameters would eventually cause a crash

As part of r25.2.3

- DSOF-24726 - Fixed a “No video in texture for videoin_1.mov -” warning error on Video Input device
- DSOF-25031 - Fixed issue related to manual AR calibration
- DSOF-25040 - RenderStream: Fixed multiple Access Violations when starting a workload with proxy streams
- DSOF-25044 - Fixed an issue where Rotation Delay for tracking sources was not updated by the field in the delay calibration widget
- DSOF-24761 - Fixed an issue where Indirection Media didn't indicate that it is a value set by indirection when the value is None
