r30.3.4 Changelog

```
+----------------------------------+
|   r30.3.4 Release - 208854    |
+----------------------------------+
```

Release day: February 19th 2025

Fixes

- **DSOF-28855** - Using a Designer license to launch Designer on a Solo as an editor will no longer cause the Solo to initiate a count-down and quit the software due to licensing restrictions. (This will still happen if you try to use the server in other roles with it's Solo license in versions after r30.0).

- **DSOF-29365** - Setting the "Camera plate" setting of a spatial map to "Horizontal Back and Front Plates" setting will now work correctly again.

- **DSOF-29463** - Jumping to a timecode cue on a different track will no longer fail to jump if the time jumping to happens to be very close to the current playhead.
